## 01 — TOP EMAILS NEEDING A REPLY

---

### Email 01 — Sagnik Sarkar (Prof.)

*Follow-up from today's class and plan for tomorrow's session*

Received: Wed, 3 Jun · 10:19 PM IST

Professor recapped yesterday's session, noted batchmates' forum participation, and assigned two Moodle problems due by 5:00 PM today. Tomorrow's 6 PM class covers mathematical functions — domain, range, convexity, and concavity.

#### Suggested Reply

Thank you for the detailed follow-up, Sagnik. I've noted the Moodle submission deadline and will have both problems in before 5 PM. Looking forward to tomorrow's session on functions.

### Email 02 — Sagnik Sarkar (Prof.)

*Re: Follow-up from today's class and plan for tomorrow*

Received: Wed, 3 Jun · 5:11 PM IST

Reminder to bring a calculator to the 6 PM class session.

#### Suggested Reply

Thanks for the heads-up — calculator will be ready for class.

**Note: This session may have already occurred. Confirm if a reply is still needed.**

### Email 03 — Coursera

*Your submission has been graded*

Received: Thu, 4 Jun · 2:38 AM IST

Pre-MBA Statistics submission on Coursera has been graded; peer feedback is now available.

#### Suggested Reply

No reply needed. Action: log in to Coursera and review your grade and peer feedback.

### Email 04 — IIM-A Moodle

*MPP-MREP-SEC-A: Advertising Campaign Budget Allocation*

Received: Wed, 3 Jun · 12:58 PM IST

Batchmate posted a forum problem on linear programming for advertising budget allocation — maps to current coursework.

#### Suggested Reply

Interesting framing — the constraint setup maps cleanly to the LP problems covered in class. Worth building on this in tomorrow's discussion.

### Email 05 — Google

*Security alert — Recovery phone & email changed*

Received: Wed, 3 Jun · 6:28–6:34 PM IST

Three security alerts in quick succession: new Mac sign-in detected, and account recovery phone and email were both changed.

Suggested Reply

No reply needed — but immediate action required if these changes were not made by you. Review recent security activity at [myaccount.google.com](https://myaccount.google.com).

**URGENT: If you did not initiate these changes, initiate account recovery immediately.**

02 — TODAY'S MEETINGS & CALENDAR

No events were found on Google Calendar for today. However, based on email context, the following session is confirmed:

|            |                                                                                                                                          |
|------------|------------------------------------------------------------------------------------------------------------------------------------------|
| Time       | 6:00 PM IST                                                                                                                              |
| Session    | Pre-MBA Mathematics — MPP-MREP-SEC-A                                                                                                     |
| Instructor | Prof. Sagnik Sarkar                                                                                                                      |
| Topic      | Mathematical functions: domain, range, convexity, concavity                                                                              |
| Prep Note  | Think through real-world input/output examples (tax bands, loyalty tiers, performance ratings) before walking in. Bring your calculator. |
| Action     | Add this to Google Calendar to avoid missing future classes.                                                                             |

03 — PRIORITY TASKS FOR TODAY

- 1

**Submit Moodle assignment by 5:00 PM**  
The professor explicitly set this deadline. Done = two problem solutions uploaded to the Moodle course page before 5 PM IST.
- 2

**Verify Google account security**  
Three alerts in six minutes (new sign-in + recovery phone + recovery email changed) is a serious red flag. Done = recent account activity reviewed at [myaccount.google.com](https://myaccount.google.com), changes confirmed or recovery initiated.
- 3

**Review Coursera grade and peer feedback**  
Pre-MBA Statistics submission has been graded; peer feedback is available and may inform preparation for today's math class. Done = logged in, feedback reviewed, gaps noted.

Today is a deadline day — one hard 5 PM cutoff, a 6 PM class, and a potential security issue to resolve first thing. Prioritise accordingly.
